About the course

Join us for our multidisciplinary oncology-focused imaging course, showcasing the very best in cancer imaging.

Delegates will understand how close collaboration between radiologists and oncologists can optimise management for cancer patients.

Day 1 – Radiologist led

The first day of the course focuses on imaging for different tumour types with interactive case-based lectures and discussions, delivered jointly by experts from clinical radiology and oncology, highlighting key learning points from both disciplines.

Day 2 – Radiographer led

Day two will focus on understanding and consolidating the roles of diagnostic radiology and radiotherapy in the treatment of oncology patients' treatment planning through to delivery, delivered jointly by specialist diagnostic and therapy radiographers.

Who is the course for?

- Radiologists
- Oncologists
- Trainees
- Radiographers
- Allied imaging professionals

Who are the speakers?

The speakers are some of Britain's leading cancer treatment and imaging experts, based at Mount Vernon Hospital.
